Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant asserted that the present invention is drawn to a system of dialing devices wherein those dialing devices are switches/call centers. However, in the prior office action, examiner asserted that one interpretation of claim 1 is that the claimed dialing devices can be read simply as an agent workstation or telephone and the Szlam et al. reference then would read on the present invention. Applicant agreed to amend the present claims as per the allowable subject matter presented in the previous office action and in a continuing/new application would present amended claims more clearly reciting the dialing.device/call center aspect of the present invention.
